

**THE SCREWDRIVER  
THAT ADAPTS TO  
THE SHAPE OF  
YOUR HAND**

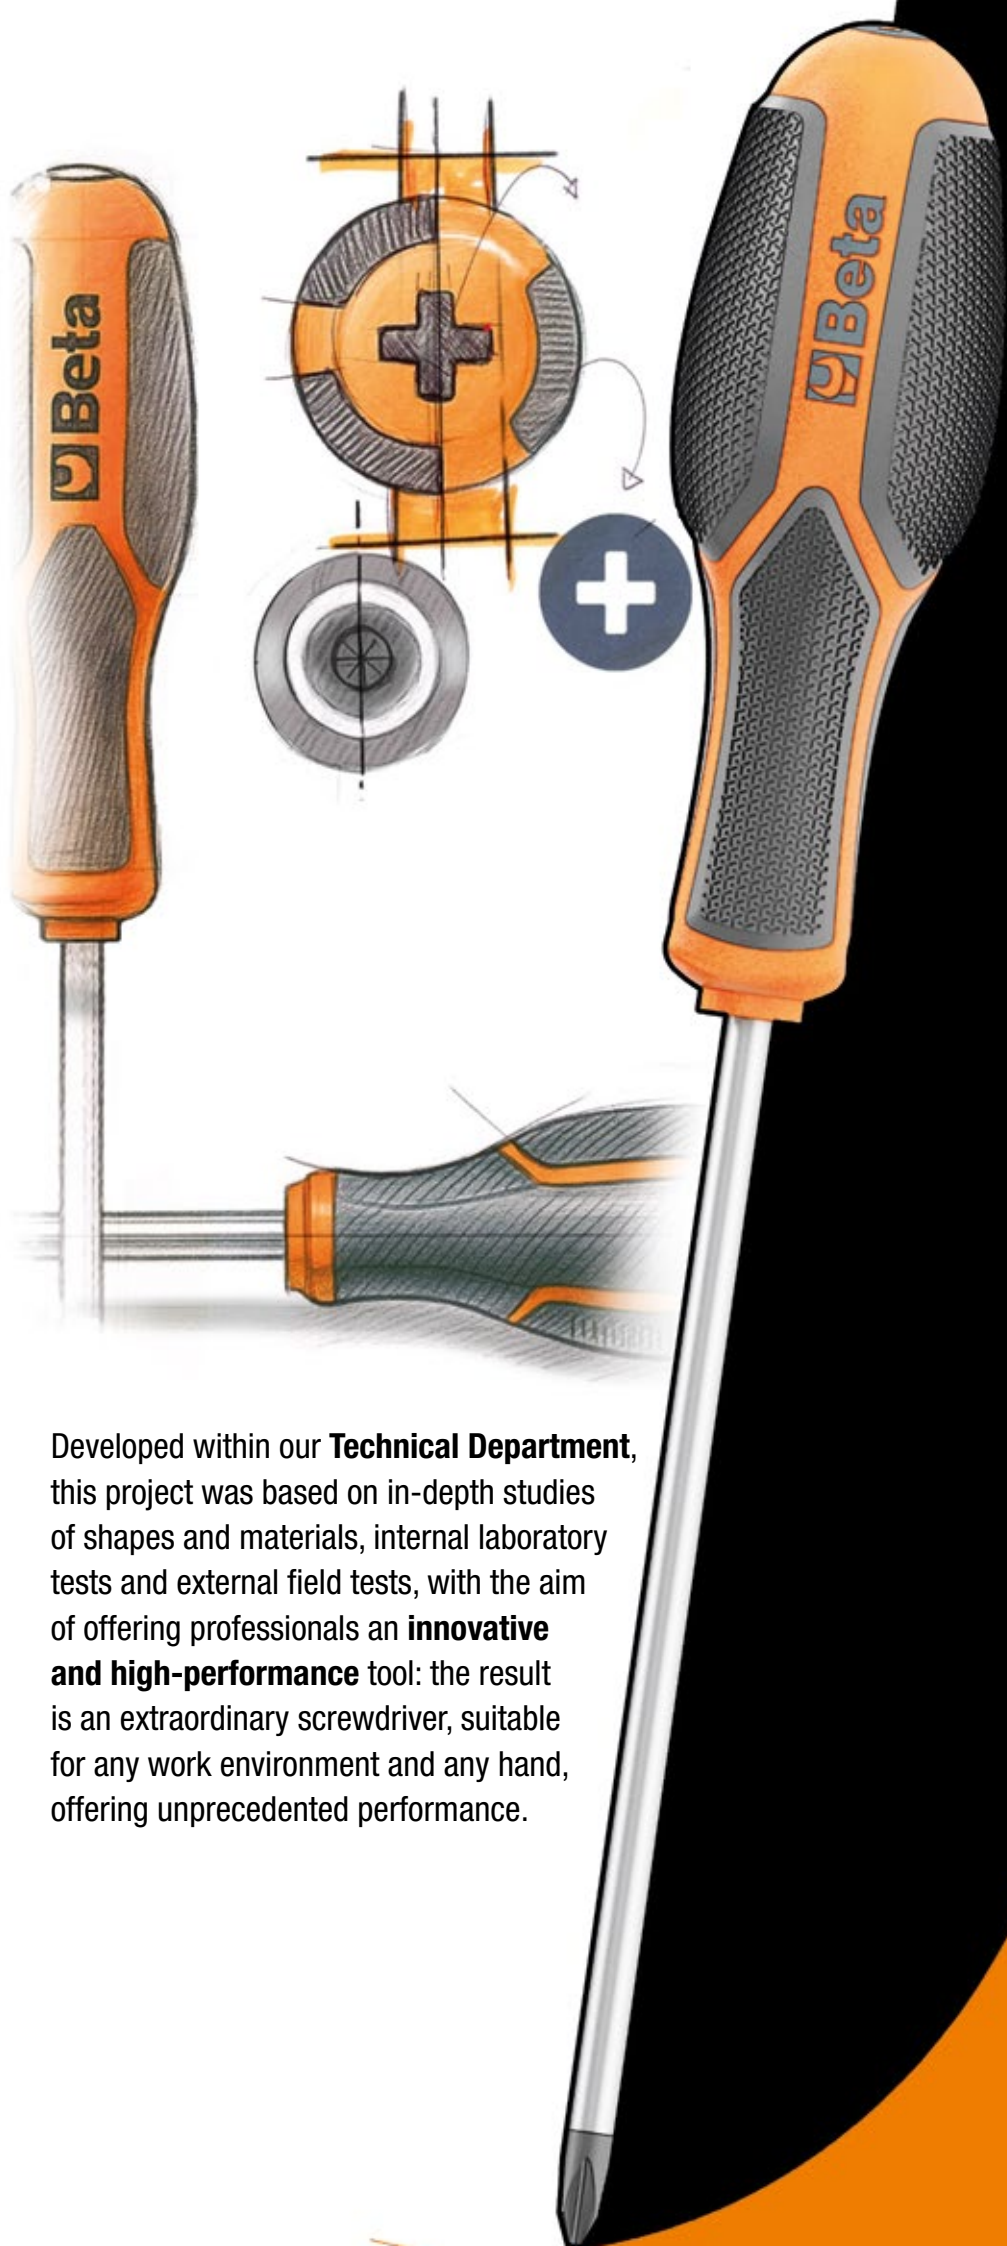

# The new Beta Morphos screwdriver

is the result of Beta Utensili's years of experience in designing and developing high-quality hand tools, combining technical know-how with attention to the real needs of everyday work.

Developed within our **Technical Department**, this project was based on in-depth studies of shapes and materials, internal laboratory tests and external field tests, with the aim of offering professionals an **innovative and high-performance** tool: the result is an extraordinary screwdriver, suitable for any work environment and any hand, offering unprecedented performance.

# THE SCREWDRIVER THAT ADAPTS TO

## Ergonomics

### **HANDLE WITH INNOVATIVE TRIMATERIC STRUCTURE**

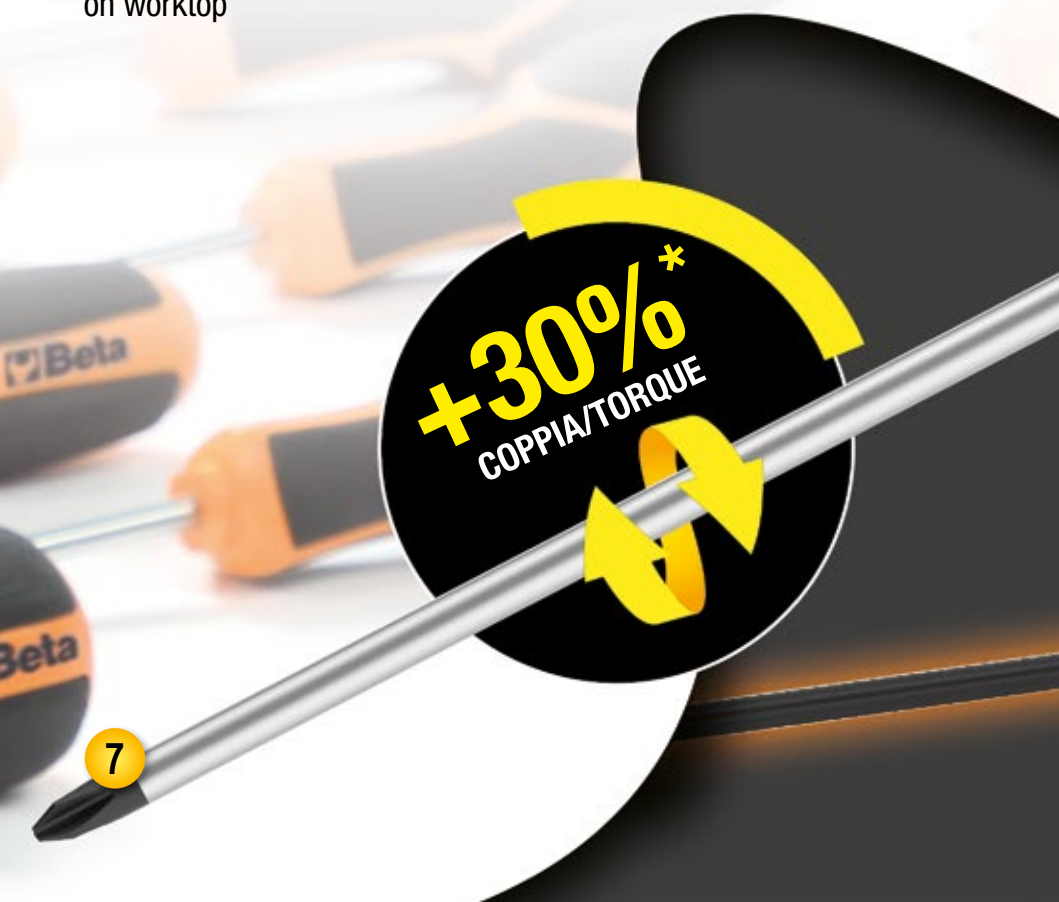

1. Ultra-soft thermoplastic rubber (TPR) core that shapes in a controlled manner to adapt to the hand and improve comfort and torque transmission
2. TPR insert with non-slip texture
3. Polypropylene body offering stability and resistance

## Control

### **OPTIMAL GRIP EVEN IN THE MOST DEMANDING CONDITIONS**

4. Material resistant to hydrocarbons, grease, oil, dirt...
5. Triangular section for reduced rolling on worktop

# THE SHAPE OF YOUR HAND

## Power

### **REDUCED EFFORT AND HIGHER PERFORMANCE IN EACH APPLICATION**

More than 30% additional torque compared to the previous models\*, thanks to the perfect fit between the handle and the hand.

6. Immediate blade identification on head

7. Black phosphated tip for more accurate coupling with the screw and improved wear resistance

\*internal laboratory tests
